Chukwuka Okwusiuno

Aspiring Software Developer — Mobile Applications, Full-Stack Development, API Integrations

33 Alister Drive, Brampton, ON, L6X 5G5

Canadian Citizen | okwsly@gmail.com | 289-544-3107 | github.com/ChukwukaOk | linkedin.com/in/chukwukao

EDUCATION

Wilfrid Laurier University — Waterloo, ON
Bachelor of Science in Computer Science — *Expected 2028*

EXPERIENCE

Freelance Developer — June 2023 – Present
Remote
- Delivered full stack solutions using HTML, CSS, JavaScript, SwiftUI, Python, and C++ for individual clients and small businesses.
- Completed 5+ freelance projects, including web applications, mobile apps, and data structure visualizations, receiving 100% positive feedback.
- Developed a Currency Converter app using a real-time exchange rate API and deployed Ontario Financial Literacy resources (mobile app and website).
- Strengthened client communication, project management, and technical problem-solving skills through real world project delivery.

Apple Developer Program — January 2024 – Present
Apple — *Remote*
- Developed and tested native applications for iOS, macOS, and watchOS platforms using Swift and SwiftUI.
- Gained early access to beta software, tools, and advanced app capabilities through Apple's developer ecosystem.
- Prepared applications for App Store deployment following Apple's design guidelines and technical requirements.

Inclusion Instructor (Camps) — July 2024 – Present
City of Brampton — *Brampton, ON*
- Designed inclusive activities tailored to children with diverse needs.
- Promoted teamwork and creativity through programming and leadership.

PROJECTS

Portfolio Website | *HTML, CSS, JavaScript* — June 2023
- Built a comprehensive portfolio website showcasing released projects, technical skills, and personal stories.
- Highlighted achievements, ongoing work, and insights into my journey as a developer.

Ontario Financial Literacy Test App | *SwiftUI, GitHub* — November 2024
- Collaborated in a team of 3 to design an iOS app for Ontario Financial Literacy Test preparation.
- Implemented interactive quizzes, tracking user performance and providing instant feedback.
- Scheduled for App Store release; full project hosted on GitHub.

Ontario Financial Literacy Website | *HTML, CSS, JavaScript* — November 2024
- Developed and deployed a responsive website on Netlify for financial literacy test practice.
- Built modular front-end components to ensure easy updates and content scalability.

Laurier Connect | *SwiftUI* — December 2024
- Developed a SwiftUI platform to foster connections among Laurier University students.
- Implemented user authentication, profile management, and community event posting features.

Currency Converter App | *SwiftUI, GitHub* — December 2024
- Designed and developed a user-friendly iOS app enabling real-time currency conversions using a live exchange rate API.
- Integrated API error handling and optimized UI responsiveness to ensure seamless user experience.
- Set to launch on the App Store; full source code available on GitHub.

Technical Skills

Languages: HTML, CSS, JavaScript, Java, Python, SwiftUI, and C++
Development: Front-end development, Mobile App Design (SwiftUI), Back-end basics (Python)
Tools: Git, XCode, Visual Studio Code, Node.js, ReactJS, Eclipse, API integration
